Accepted 25 September 2010

Supplementary Figure S1. Aβ1-40 binds to α7 nAChRs in differentiated PC12 cells. Homogenates of PC12 cells were used for [125I]Aβ1-40 binding in the presence of varenicline, (-)nicotine, mecamylamine (Mec) and MLA, respectively. The data is expressed as mean ± SEM of three independent experiments. **p<0.01 and ***p<0.001.
