

Announcement for a Supplementary Issue

The supplementary issue of the *Journal of Alzheimer's Disease* is an open invitation for the papers in the field of novel molecular pathways and therapeutic challenges in neurodegenerative diseases. The publication cost and open access is supported by National Secretariat of Science, Technology and Innovation (SENACYT), Panamá.

Submission deadline is December 31, 2022. In the cover letter of the article submission, please mention that you are invited for the supplementary issue. Guest Editors for this supplementary issue are:

- Jagannatha Rao KS, PhD, Panama and India, k5n2009@gmail.com
- Lezanne Ooi, PhD, Australia, lezanne@uow.edu.au
- Muralidhar Hegde, PhD, USA, mlhegde@houstonmethodist.org
- Yan Zhang, PhD, China, yanzhang@pku.edu.cn
- Yuk Yu Nancy, PhD, Hong Kong, boip@ust.hk
- Mohammad Nami, PhD, Iran, mtneurosci2@gmail.com
- Mikko Hiltunen, PhD, Finland, mikko.hiltunen@uef.fi
- John Chua Jia En, PhD, Singapore, phsjcjc@nus.edu.sg
- Cecilia Bouzat, PhD, Argentina, inbouzat@criba.edu.ar
- Samuel Abraham, MD, PhD, Japan, drsam@nichimail.jp

Background of the Supplementary Issue: It is known that the incidence of neurodegenerative disorders has augmented significantly in the world population due to an increase in life expectancy. Despite an enormous upsurge in our understanding of the cellular and molecular pathways associated with cell death, the key molecular determinants to modulate these processes in human diseases is still not revealed completely, hindering the development of effective treatments and prevention avenues for aging, and neurodegeneration. Many new innovative approaches needed to understand novel molecular pathways and therapeutics in neurodegenerative diseases. This Supplementary Issue will be a Topical Collection of original articles and focused thematic reviews/research papers on novel molecular pathways and therapeutic challenges in neurodegenerative diseases
